COVID-19 Daily update
3/20/2020

The Public Health Team, represented by Jen (ICMS), Kerry (Ambulance), and Marc (EMA Director), met with staff at the grocery store to talk about best practices. They were able to answer some questions about how to keep themselves and their customers as safe as possible. Carvers will remain open, and will continue to supply food to our citizens!

People have been asking: “What is being done to explain to people coming to Vinalhaven that our supplies and access to resources are limited?” On Thursday, March 19th, the BOS released a statement for travelers to recognize that our community is at the end of a supply chain with limited medical resources. The statement suggests that travelers strongly consider whether this truly is the best place for them to come, given the limitations and the additional strain it will put on the community’s resources.

Kudos: A BIG thank you to those that have stepped up this week in the school community to deliver learning materials to students. You parents out there that have become teachers this week, you will do great. And for those that have been putting in the hours to volunteer with food deliveries, conversations, medical/emergency care, also a big thank you!
