COVID-19 Daily update
3/21/2020

The Town, as directed by the Board of Selectmen, is setting up an Emergency Operations Center. This will allow our Public Health Team (Jen, Kerry, Marc, Andy) to work more efficiently together (while practicing safe social distancing).

In addition, the Town is organizing a Community Outreach Team, which includes the Public Health Team and several other people in a support role. The Team will work to reach all sectors and populations of the community with current information about best practices, how volunteers can safely help the community, and to offer support to businesses and organizations about what could and should be done to mitigate staff and customer contact with the virus.

With daily access to the best information in the State, the goal of the Public Health Team is that our citizens will look to the Town information pages for true and current information. Our current list of recommendations can be found at the Town’s website.

Missing your Saturday night social life? How about getting your friends together with the Zoom App? No charge for meetings of 40 minutes or less – you can take turns hosting and hang out all evening.
