

1/30/2019

Gabe, Anna, Hillary, Eric, Pat

Hannah Noyes

Hannah is doing a waste audit as an internship looking for something that could be diverted from the garbage. So February she sets up and comes back in June to come back ready to go into it.

Katrina coming to the school tomorrow at 10-11, presentations, 11-130,. Community 1-130, 9-12 kids.

Suggest Hannah come (she will). Bringing recycle bins

Hillary: School recycling has gone down hill – was contamination plastic wrap and mailers, liquid filled plastic. !!:1 trash bags

Pat:– ICMS is doing a good job on recycling; 6 month report; Pat to do town training on recycling.

Eric: - Weighing thing on backhoe; Need more manure? Call Anna

Anna: Marc gave some figures on percentage of food waste potentially divertable. 700 tons of MSW annually assume 28% compostable, downgraded to 25% for estimates, 350,000 pounds food scraps. @ 120/ton, savings of \$21,000 in disposal costs. DEP grants are \$8000. 300 pounds have gone in so far. Looking at other locations to accommodate more. Interim location needs to be found. Thumbs up from selectmen; yes to belong to the Town. Considering going after the grant; haven't seen the application yet. Coots Point?

Gabe: Sell totes for \$5/each. About 200 . Sell to community. Air B n B and short term rentals – get the property owners on and ready for summer.
